Kawasaki* Teryx* Bowkaddy Installation Instructions

The most effective method of mounting Bowkaddy on a Kawasaki Teryx is with the use of Kaddy Bracket UTV. However, one small after-market modification is necessary to make the bracket fit the rear roll bars on these side by side vehicles. Two additional $21/64$ " holes must be drilled in the bracket at the locations shown in the image below.

For more product and installation information, visit www.bowkaddy.com or contact Alaris Concepts.
