

ALARIS CONCEPTS

KADDY BRACKET™ UTV

Product Sheet

Foreword

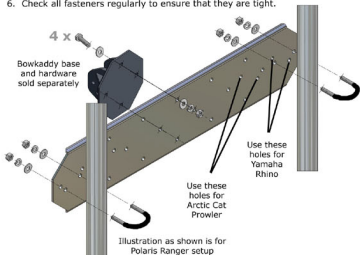

This accessory bracket is designed to be used in conjunction with Bowkaddy to facilitate safe, secure and accessible transport of your bow(s) on today's most common types of UTV's including Arctic Cat Prowlers, Polaris Rangers, Yamaha Rhinos and others. For further information including an electronic copy of this document, visit www.bowkaddy.com.

Contents

This package contains the following:	1 x Metal bracket plate	4 x 5/16" lock washers
	2 x 5/16" rubberized U-bolts	4 x 5/16" nuts
	4 x 5/16" flat washers	1 x Product Sheet

Installation and Use

1. Position the metal bracket in the appropriate position against the back of the rear roll bars such that the U-bolts line up with the proper holes as determined from the illustration below. If none of the existing holes match the geometry of your UTV roll bars, additional holes may be drilled into the bracket. If this is to be done, use a 5/16" metal bit and drill the holes 2" between centers. Hole centers should be at least 5/8" from existing hole centers and from the edge of the bracket. Remember to follow all safety rules and procedures when using power tools.
2. Put the flat washers, lock washers and nuts on the U-bolts as shown below and hand-tighten. Slight repositioning of the bracket may be necessary to ensure it is horizontal.
3. Tighten the bracket in place by using a 1/2" wrench on the nuts.
4. Attach Bowkaddy to Kaddy Bracket UTV using the hardware provided with Bowkaddy. Note - the location and orientation of the Bowkaddy base may vary depending on the number of Bowkaddy units being installed (one or two).
5. Insert the bow(s) and verify that there is adequate clearance around the bow(s). Reposition the bracket and Bowkaddy as necessary to minimize the risk of equipment damage.
6. Check all fasteners regularly to ensure that they are tight.

Warranty and Disclaimer

Bowkaddy and accessories are designed for maximum mounting versatility. However, if you are unable to mount Bowkaddy in a secure and accessible location, Alaris Concepts will accept a return shipment of the product(s) along with proof(s) of purchase in exchange for a refund equal to the purchase price. When assembled, installed and used as per these instructions, Alaris Concepts warrants any original product defects for a period of 5 years. Damage to Bowkaddy, Kaddy Bracket UTV, archery equipment and /or UTV resulting from poor installation and/or misuse of the product(s) is not covered by Alaris Concepts. Alaris Concepts reminds all users to know and follow all applicable regulations governing the transportation and deployment of archery weapons.
